June 9, 1980

Mr William Brandt, Director
Department of Public Works
City of Waukegan
196 North Utica Street
Waukegan, Illinois 60035

Dear Mr Brandt

Your solid waste disposal facility located at the intersection of Yorkhouse and McArce Roads in Waukegan was inspected on April 9, 1980, by Jeff Stofferahn, representing this Agency

The inspection disclosed the following condition(s) which constitute violations of the Environmental Protection Act and Chapter 7 of the Illinois Pollution Control Board Solid Waste Rules and Regulations

Leachate was ponded in the south drainage ditch You should take immediate action to correct this violation

Leachate was observed to be seeping from the filled areas into the south and east perimeter drainage ditches You should take immediate action to correct this situation

Several piles of landscape waste were found in the southwest portion of the site As the site has been closed and covered, no waste can now be accepted for deposition, nor can it be allowed to remain on the site Should this condition be due to random dumping, the placement of adequate site restrictions should prevent additional random dumping The waste now present should be removed to an Agency permitted landfill.

Page 2

We suggest that you correct the aforementioned violations. A reinspection will be made in the near future to determine your progress.

Sincerely,

Kenneth P. Bechely, Northern Region Manager
Field Operations Section
Division of Land/Noise Pollution Control
